### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

- With regard to independent claim 1, as the closest reference of record, Hasagawa et al (US 2004/0106012) shows a magnetoresistive read sensor in Fig. 1 including: a first shield layer; a first gap layer over the first shield layer, a spin-valve stack over the first gap layer, the spin-valve stack including: a seed layer over the first gap layer, an antiferromagnetic layer over the seed layer; and a free layer over a first portion of the antiferromagnetic layer; and a bias structure adjacent to the free layer, the bias structure located over a second portion of the ferromagnetic layer and isolated from the seed layer by the second portion; **but fails to show** that at least a portion of the seed layer including a **soft-magnetic** material, and an antiferromagnetic layer over the seed layer, the antiferromagnetic layer magnetically **decoupled** from the seed layer.
- Applicant asserts; that in his invention the read sensor 10 comprises an exchange break layer 84 between the antiferromagnetic layer 44 and the seed layer 42, as schematically illustrated by Figure 2, which "magnetically decouples the antiferromagnetic layer 44 from the seed layer 42 by "breaking" or reducing the exchange coupling between the two layers. Hasagawa et al does not show the exchange break layer (Specification, p. 6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
